

ACTIUM PATRIMONI CULTURAL, SL

COMPANY PROFILE

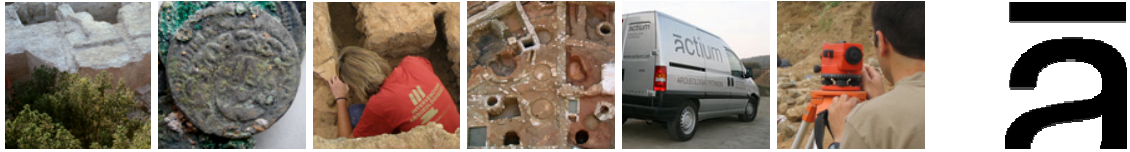

ACTIUM is a historical and archaeological heritage management company which has a top level professional team and uses the most advanced technology in the field.

We provide a response to the increasingly strict demands of a society that is committed to its cultural heritage and its future.

The services that ACTIUM offers are based on quality and rigorous standards of research and on technical and methodological innovation in management. Based on these premises, we apply the most suitable solutions to each situation.

ACTIUM SCP was founded in 2001 by several liberal professionals from the archaeology and cultural heritage sector.

After a short and successful embryonic phase, ACTIUM PATRIMONI CULTURAL, S.L. was established in 2003 to consolidate the company in business terms and provide improved responses to its clients.

The diversification of cultural heritage services and the increase in its work since 2006 has allowed the company to restructure towards specialising its resources and professionals.

Working in various areas of cultural heritage requires personnel with multidisciplinary training. For this reason, the ACTIUM team includes various professionals, such as archaeologists, historians, museologists and restorers, and works with other professionals in similar disciplines.

The young team at ACTIUM includes professionals with over 10 years' experience in various areas in the sector and applies the optimum methods and resources with a modern, practical and operational approach which is always based on teamwork.

Services: archaeology

We provide comprehensive services for the scientific and technical study of archaeology and advise companies and institutions on how to find the best solutions to the various problems involved in regional planning, building and the construction of infrastructures. At ACTIUM we meet the needs of promoters, processing scientific data thoroughly and with the utmost flexibility.

Archaeological work

- Archaeological digs.
- Monitoring, checking and co-ordination of works.
- Prospecting and drilling.

Restoration and conservation of sites

- Restoration and adaptation of sites and historical areas.
- Preventive conservation of archaeological buildings.
- Maintenance of archaeological parks and remains in interpretation centres.

Topography and surveying

- Topographical surveys of archaeological sites and historical heritage features.
- Archaeological field surveying.
- Digitalisation and computer treatment of site surveying

Technical and auxiliary assistance

- Archaeology assistants and technical support to complement and improve documentation work.

Analysis of sediments and materials

- Complementary studies for categorising, dating and analysis of sediments, materials and structures.
- Physical anthropology.

Scientific publications

- Preparation and production of historical and archaeological research publications.

Services: cultural heritage

ACTIUM works to preserve cultural heritage, by means of studies, inventories and cataloguing as a municipal, regional and national management tool.

Cataloguing of cultural heritage

- Inventories of cultural heritage.
- Catalogues of historical and archaeological heritage for special protection plans.
- Archaeological maps.

Historical studies of buildings

- Architectonic studies and historical analysis of buildings and monuments.
- Synthesis studies of archaeological sites and areas.

Documentary and historical research

- Documentary and archive research and historical studies in various fields.

Services: museums, archives and collections

Cultural facilities such as museums, archives and collections have an enormous wealth of objects and documents which must be preserved. ACTIUM provides various services for managing this heritage from a threefold study perspective – documentation, conservation and dissemination.

Study and documentation of objects and collections

- Classification and cataloguing of objects and documents from museums, archives and collections.
- Computer data processing (Assisted Collection Documentation - ACD – Museum Plus, etc.)
- Comprehensive treatment of archaeological materials (cleaning, coding, classification, inventory and study).

Restoration and conservation of movable heritage

- Restoration and conservation of historical objects and documents from museums, archives and collections.
- Restoration and preventive conservation of archaeological materials.

Museography and exhibitions

- Museographical projects.

- Production of exhibitions.
- Information searches and production of content.

Services: dissemination

Dissemination is the ultimate objective of cultural heritage management. ACTIUM has various resources enabling it to provide various didactic, pedagogical and cultural tourism services to meet society's desire to discover and understand its origins.

Boosting cultural heritage

- Projects to highlight cultural heritage and facilities.
- Planning of cultural tourism programmes and products.

Activities

- Didactic workshops, guided visits, cultural routes.

Cultural information and visitor services

- Hall security services, reception of visitors, cultural information.

Publications and dissemination

- Production of content for dissemination and educational publications.
- Publication of information leaflets and pamphlets.
- Production of teaching materials and resources.
